

INSIGHTFUL · CUSTOMER INTELLIGENCE

Crystorama

Customer Intelligence Report

April 2025 – April 2026 (Trailing 12 Months) · Report Date: April 20, 2026 · iPad + eCat
Online + Sales Portal

Confidential — prepared for Crystorama use only

§1 Executive Summary

- 1

Three high-GMV reps went silent — Steve Linder (\$57K), Brad Dobson (\$50K), and Megan Trosclair (\$28K) placed zero orders in the most recent quarter despite combined trailing-12-month iPad GMV of \$135K. Steve Linder’s logins rose 96%, signaling engagement without ordering. [→ Sales Team](#)
- 2

81% of activated eCat buyers have lapsed — Only 113 of 608 accounts that have ever placed an eCat order remained active in the trailing 12 months, yielding an 18.6% retention rate. [→ Customers](#)
- 3

20 top sellers currently out of stock — Products generating \$2.5M in cumulative all-channel sales show zero available inventory, with most restocks scheduled by mid-June 2026. [→ Product](#)
- 4

100% catalog completeness across 2,077 products — Every visible product has imagery and pricing in place, requiring no catalog maintenance action. [→ Product](#)
- 5

eCat captures 1.4% of \$39.3M all-channel business — 168 iPad orders totaling \$555K in the trailing 12 months, with January 2026 alone driving 57% of eCat GMV during a market event. [→ Commerce](#)
- 6

Value delivery leads peers at top quartile — Crystorama scores 100 out of 100 on value delivery, 20 points above the peer median of 80 among comparable Lighting manufacturers in the trailing 12 months. [→ Peer Benchmark](#)

Priority Actions

HIGH

Re-engage three silent high-GMV reps

Steve Linder, Brad Dobson, and Megan Trosclair contributed \$135K in trailing-12-month iPad GMV but placed zero orders in the most recent quarter. Re-engaging them could potentially recover \$30K–\$50K in quarterly volume.

Up to \$50K/qtr

HIGH

Re-engage 25 dormant high-value accounts

Previously active buyers representing \$230K in historical eCat value have gone quiet. The top 5 accounts alone could potentially contribute up to \$89K in recovered annual volume.

Up to \$89K potential

HIGH

Coordinate pre-sell for out-of-stock top sellers

20 top-selling items with \$2.5M in cumulative all-channel sales have restocks arriving May–June 2026. Pre-sell outreach could capture pent-up demand ahead of availability.

Pent-up demand

MEDIUM

Refresh stale configuration data

9 configuration entities (options, pricing, kits) haven’t been updated since August 2025 while product data refreshes daily. Resolving this drift ensures reps see current options when configuring orders.

Config accuracy

§2 Sales Team Performance

5 qualifying reps · 1 showroom excluded · \$547K iPad GMV trailing 12 months

Rep Activity Ladder

The top 10 reps by iPad GMV account for \$424K of the team's \$547K in iPad-originated revenue over the trailing 12 months. Five reps maintained consistent ordering activity across the period.

#	REP	ORDERS	GMV	AVG ORDER VALUE	CUSTOMERS
1	Jeff Nicholson	19	\$71,051	\$3,740	19
2	Chas Lassoff	11	\$58,374	\$5,307	7
3	Katy McCully	38	\$56,763	\$1,494	14
4	Steve Linder	6	\$56,623	\$9,437	5
5	Brad Dobson	4	\$49,831	\$12,458	4
6	Vince Hall	9	\$34,470	\$3,830	9
7	Megan Trosclair	5	\$28,132	\$5,626	5
8	Matt Sullivan	11	\$24,584	\$2,235	9
9	Mike Hemsarth	5	\$22,616	\$4,523	2
10	Zachary Rapp	10	\$21,875	\$2,187	4

Your top five reps concentrate 53% of all iPad GMV, trailing 12 months. Order values range widely — from Katy McCully's \$1,494 average to Brad Dobson's \$12,458 — revealing very different selling approaches across the team. Jeff Nicholson stands out for both GMV leadership and the broadest customer reach at 19 unique accounts.

Behavioral Scorecard Spotlight

Platform engagement data covers 20 of the top reps by iPad GMV over the trailing 12 months. The primary behavioral funnel measured is the ratio of product discovery to customer targeting — a low ratio suggests a rep is selecting accounts but not exploring the catalog deeply enough to broaden their order mix.

15

REPS ORDERING (LAST 90 DAYS)
of 138 active platform users

147

MEDIAN DAYS ACTIVE
Top 20 reps, trailing 12 months

5 of 20

REPS WITH DISCOVERY GAP
Bottom-quartile discovery-to-targeting ratio

2.9:1

MEDIAN DISCOVERY RATIO
Product exploration per customer targeted

Five reps fall in the bottom quartile for discovery-to-targeting ratio (below 1.9:1), meaning they target customers at a higher rate than they explore products — a pattern associated with narrower order mixes and lower average order values.

REP	IPAD GMV (LTM)	DISCOVERY RATIO	PATTERN
Brad Krieger	\$6,348	0.6:1	Most active platform user (417 days, 5,422 events) with very few orders — heavy account lookup and information access
Jeff Izower	\$12,496	0.7:1	Inverted ratio — more targeting than discovery; concentrated on a single customer
Zachary Rapp	\$21,875	1.3:1	High targeting activity (717 events) with proportionally low product discovery
Shelly Orban	\$19,845	1.9:1	Moderate volume (6 orders) but discovery activity trails customer targeting
Brad Dobson	\$49,831	1.9:1	Highest AOV (\$12,458) but only 4 orders — selective yet under-exploring the catalog

High engagement, low conversion

Several reps log significant platform time without proportional ordering. Zachary Rapp, for example, has been active 320 days with over 4,200 engagement events in the trailing 12 months but placed only 10 orders. Bridging the gap between browsing and ordering represents one of the clearest growth levers for this team.

Reps who target accounts but under-discover products tend to submit narrower orders. Coaching these five reps on catalog navigation and product pairing could lift both order frequency and average order value — particularly for Zachary Rapp and Brad Dobson, where the engagement-to-order gap is widest.

Selling Archetypes

Based on platform engagement patterns and order data from the trailing 12 months, the top 20 reps by iPad GMV cluster into two distinct selling styles. Archetypes are assigned using engagement dimensions, order frequency, average order value, and customer breadth.

ARCHETYPE	REP (S)	SIGNATURE	IMPLICATION
CURATED DISCOVERY SELLER	Jeff Nicholson, Vince Hall, Forrest Denbow	Top-quartile presentation activity combined with high product discovery and above-median order values (\$3,740–\$5,494 AOV, trailing 12 months)	Optimize with curated collections and presentation-ready content — these reps invest in showing before closing
VOLUME RELATIONSHIP SELLER	Katy McCully, Matt Sullivan, Cindy Rogers	Broad customer coverage (6–14 accounts), highest order frequency, and below-median AOV (\$1,002–\$2,235, trailing 12 months)	Focus coaching on average order value expansion — bundling, upselling, and higher-value product recommendations rather than additional breadth

Archetypes are coaching tools, not performance labels

Each archetype reflects a natural selling style, not a ranking. A Volume Relationship Seller like Katy McCully drives \$57K in GMV through frequency and breadth — coaching her should focus on average order value support, not broader reach. A Curated Discovery Seller like Jeff Nicholson benefits from richer presentation tools and product storytelling, not order-frequency pressure.

Two distinct selling styles account for six of the top reps. Tailoring coaching to each archetype — average order value support for Volume Relationship Sellers, workflow optimization for Curated Discovery Sellers — will produce stronger results than a one-size-fits-all approach.

Coaching Opportunities

The following reps show the most actionable gaps between their platform engagement and ordering outcomes in the trailing 12 months. Each card identifies a specific coaching focus with estimated upside.

Zachary Rapp

DISCOVERY GAP

Active 320 days with over 4,200 platform events but averaging \$2,187 per order across 10 orders, trailing 12 months — well below the team's \$3,704 median. His discovery-to-targeting ratio of 1.3:1 suggests he is selecting accounts without fully exploring the catalog.

Coach on deeper product exploration per account visit — broader discovery correlates with higher-value order mixes

+\$15K potential annual GMV

Brad Dobson

FREQUENCY GAP

Highest average order value on the team (\$12,458) but only 4 orders in the trailing 12 months. His discovery ratio of 1.9:1 shows limited catalog exploration relative to customer targeting, which may be constraining reorder frequency with existing accounts.

Encourage broader catalog exploration and more frequent touchpoints with his 4 existing accounts

+\$25K potential annual GMV

Jeff Izower

DISCOVERY GAP

Three orders to a single customer at \$4,165 average order value, trailing 12 months. His discovery ratio is inverted at 0.7:1 — he spends more time on customer targeting than product exploration, limiting both his product mix and customer expansion.

Focus on product discovery workflows and expanding beyond single-customer concentration

+\$12K potential annual GMV

Shelly Orban

DISCOVERY GAP

Six orders across 5 customers at \$3,308 average order value, trailing 12 months. Her discovery-to-targeting ratio of 1.9:1 falls in the bottom quartile, suggesting she could expand product exploration per customer visit to increase order frequency.

Guide on catalog navigation and product pairing to broaden the mix per order

+\$7K potential annual GMV

Rep Engagement Trajectory

Comparing the most recent 90-day window to the prior 90 days reveals sharp momentum shifts across the team. Five reps are accelerating their ordering activity while five others — including three top-10 GMV contributors — have gone silent.

Accelerating Reps

REP	ORDERS (PRIOR 90D)	ORDERS (CURRENT 90D)	CHANGE	CURRENT 90D GMV
Katy McCully	9	21	+133%	\$33,340
Jeff Nicholson	6	13	+117%	\$48,083
Zachary Rapp	2	4	+100%	\$13,015
Vince Hall	3	5	+67%	\$16,000
Matt Sullivan	0	7	New	\$14,771

Three high-GMV reps went silent

Steve Linder (\$57K trailing 12 months), Brad Dobson (\$50K), and Megan Trosclair (\$28K) placed zero orders in the most recent 90-day period. Notably, Steve Linder's login activity *increased* 96% — he is still engaging with the platform but not ordering. Combined, these three reps represented \$135K in trailing-12-month iPad GMV.

Declining Reps

REP	ORDERS (PRIOR 90D)	ORDERS (CURRENT 90D)	CHANGE	LOGIN TREND
Steve Linder	6	0	-100%	LOGINS +96%
Megan Trosclair	5	0	-100%	LOGINS -88%
Brad Dobson	4	0	-100%	LOGINS -41%
Shelly Orban	3	0	-100%	LOGINS +110%
Kelly York	2	0	-100%	LOGINS -44%

Ordering momentum is polarizing — your top two GMV reps are accelerating sharply, but three mid-to-high performers have stopped ordering entirely. Steve Linder and Shelly Orban are still logging in frequently, which suggests their order pipeline may not be lost — a check-in could re-activate them. Megan Trosclair's combined login and order decline warrants more immediate attention.

Territory Coverage

Crystorama's customer base spans 60 territory codes. Customer assignment is heavily concentrated in the top three territories, which hold roughly 25% of all assigned accounts. A long tail of territories with fewer than 10 customers suggests uneven coverage.

#	TERRITORY	ASSIGNED CUSTOMERS
1	C-14	401
2	C-18	387
3	C-99	383
4	C-129	270
5	C-155	243
6	C-07	217
7	C-57	206
8	C-26	188
9	C-119	182
10	C-02	171

Territory assignment is top-heavy — the largest three territories each hold 380+ accounts while over a dozen hold fewer than 10. The concentration pattern suggests that rep capacity planning should account for wide variation in territory size when evaluating coverage and responsiveness across the account base.

§3 Customer & Buyer Intelligence

113 active eCat buyers trailing 12 mo · 18.6% retention rate · 495 lapsed · 25 dormant high-value accounts · 67 new buyers acquired (15 mo)

Customer Activation & Network Health

Customer Concentration — Trailing 12 Months

Your top 5 eCat buyers account for roughly 18.5% of eCat order value, and no single account exceeds 4.1%. The top 10 accounts represent about 31% of volume. This indicates a well-distributed customer base with no outsized dependency on any individual buyer.

What this tells you: Only 12.9% of your full account base has ever placed an eCat order, and just 18.6% of those remain active in the trailing 12 months. With 4,115 accounts that have never ordered through eCat and another 495 who have gone quiet, there is substantial room to expand eCat adoption across your existing accounts.

Dormant High-Value Accounts

These accounts previously ordered through eCat but have had no activity in the last 3 months, ranked by historical eCat order value.

ACCOUNT	STATE	LAST ECAT ORDER	HISTORICAL ORDERS	HISTORICAL ECAT VALUE
Cregger Company, LLC	SC	Jan 2026	2	\$22,820
Wage Lighting & Design	PA	Jan 2026	3	\$20,334
Graham's Lighting	TN	Jan 2026	1	\$19,460
Lighting, Inc	TX	Jul 2025	1	\$14,278

Georgia Lighting	GA	Jan 2026	1	\$5,449
River Cities Lighting	LA	Jan 2026	1	\$5,440
Dhillon Lighting Inc.	AB	Jun 2025	1	\$5,369

ACCOUNT	STATE	LAST ECAT ORDER	HISTORICAL ORDERS	HISTORICAL ECAT VALUE
Hermitage Lighting Gallery	TN	Jan 2026	1	\$5,216
Joseph Electric Company	LA	Jan 2026	1	\$4,789
Elan Studio Lighting	LA	Jan 2026	1	\$4,689

\$230K in Historical eCat Value — 25 Dormant Accounts

These 25 dormant accounts represent roughly \$230,000 in historical eCat order value. The majority last ordered in January 2026, suggesting a wave of buyers from the winter selling season who have not yet returned. A smaller group — including Lighting, Inc, Wilhouse Designs, and White Star Supply — has been dormant since mid-2025.

What this tells you: A concentrated group of formerly active buyers — several with five-figure historical order values — has gone quiet. Re-engaging even a handful of the top accounts could meaningfully recover eCat volume, and the recency of many last-order dates suggests these relationships are still warm enough to reactivate.

Geographic Distribution

eCat ordering activity by state/province, trailing 12 months. Covers 20 regions with a combined \$532K in eCat order value.

STATE / PROVINCE	ECAT ORDERS	ECAT VALUE	UNIQUE CUSTOMERS
PA	10	\$56,133	5
AL	29	\$47,963	11
LA	11	\$42,109	11
NC	6	\$40,966	6
SC	5	\$39,550	4
TX	7	\$36,910	6
GA	9	\$36,398	9
FL	19	\$34,843	9
ON	14	\$32,059	12
TN	2	\$24,676	2
NJ	6	\$24,377	3
KY	2	\$20,690	1
NY	4	\$15,858	2
IL	5	\$14,319	3
OH	4	\$13,259	3

Southeast & Mid-Atlantic Concentration

The top 5 states (PA, AL, LA, NC, SC) account for roughly 43% of eCat order value trailing 12 months. Alabama stands out with 29 orders — the highest order count of any state — driven by 11 unique customers. Ontario is the strongest Canadian province at \$32K across 12 customers.

What this tells you: eCat activity is concentrated in the Southeast and Mid-Atlantic, with pockets of Canadian demand. States with high customer counts but lower average order values (like FL with 19 orders from 9 customers, or ON with 14 orders from 12 customers) may have room to grow per-account volume.

Reorder Velocity & Early Warning

1.5

AVG ECAT ORDERS PER BUYER

Trailing 12 months · 168 orders from 113 buyers

75%

SINGLE-ORDER BUYERS

85 of 113 active buyers placed only 1 order

12

REPEAT BUYERS (3+ ORDERS)

Trailing 12 months

Buyers with 3 or more eCat orders in the trailing 12 months, ranked by order count. These are your highest-velocity eCat accounts.

ACCOUNT	ECAT ORDERS	ECAT VALUE	AVG DAYS BETWEEN ORDERS	LAST ORDER
Lightstyle of Orlando	7	\$19,163	35 days	Jan 2026
Austell Lighting	7	\$5,747	43 days	Feb 2026
Beautiful Lights	5	\$7,121	33 days	Mar 2026
Richards Lighting	4	\$14,828	same day	Feb 2026
Mathes of Alabama Electric Supply	4	\$7,867	same day	Jan 2026

Early Warning — Overdue Repeat Buyers

Two previously high-frequency accounts have gone silent well beyond their typical reorder cadence:

ACCOUNT	TYPICAL CADENCE	LAST ECAT ORDER	STATUS
Serenite Interiors	Every ~24 days	Jun 2025	~10 MONTHS OVERDUE
Poonams by Design, LLC	Every ~42 days	Oct 2025	~6 MONTHS OVERDUE

All-Channel Repeat Rate Context

Across all-channel sales data, 54.6% of newly acquired buyers returned within 90 days in the trailing 12 months. On eCat specifically, only 25% of buyers placed more than one order — suggesting the platform has significant headroom to capture more of the repeat purchasing that is already happening through other channels.

What this tells you:

Three-quarters of eCat buyers place a single order and do not return through the platform, even though all-channel data confirms these buyers do reorder. The two flagged accounts (Serenite Interiors and Poonams by Design) were once among your most frequent eCat buyers and warrant direct outreach to understand why they stopped.

New eCat Buyer Acquisition

First-time eCat buyers acquired via rep iPad orders over the past 15 months. All acquisition is rep-driven (iPad).

67

NEW ECAT BUYERS (15 MO)
100% rep-acquired via iPad

20

PEAK MONTH – JAN 2026
~3× the typical monthly rate

27

REPS WHO ACQUIRED A NEW BUYER
Past 15 months

Monthly new-buyer acquisition trend (iPad):

MONTH	NEW ECAT BUYERS
Mar 2026	5
Feb 2026	8
Jan 2026	20
Dec 2025	1
Nov 2025	3
Oct 2025	3
Aug 2025	1
Jul 2025	3
May 2025	2
Apr 2025	2
Mar 2025	7
Feb 2025	7
Jan 2025	5

Top reps by new eCat buyer acquisition (past 15 months):

REP	NEW ECAT BUYERS ACQUIRED
Katy McCully	15
Jeff Nicholson	8
Cindy Rogers	4
Megan Trosclair	4
Zachary Rapp	3
Brad Dobson	3
Vince Hall	3
Matt Sullivan	2
Gary Ellis	2
Kevin Taylor	2
Steve Linder	2
Amit Sharma	2
Brad Krieger	2
Kelly York	1
Kristen Cavanagh	1

What this tells you: New eCat buyer acquisition is entirely rep-driven and averaged roughly 4–5 new buyers per month, with a notable spike to 20 in January 2026. Katy McCully is the standout acquirer with 15 new buyers — more than the next two reps combined. Understanding what drove the January surge and replicating Katy's acquisition approach across the broader team could accelerate new-buyer onboarding.

RIV-382-AG	Riverdale 6" Aged Brass Sconce	COL15	\$122,664	1,743	May 15, 2026
ARC-1909-GA-CL-MWP	Arcadia 32.5" Antique Gold Chandelier	COL70	\$107,657	127	Jun 10, 2026
FUL-905-BK	Fulton 18" Black Semi Flush Mount	COL43	\$106,963	503	Jun 5, 2026
NIL-70016-BF-MG	Niles 54" Black Forged + Modern Gold Chandelier	NILES	\$102,294	211	May 25, 2026
TRA-A3302-VG	Travis 12.5" Vibrant Gold Semi Flush Mount	COL8	\$95,761	945	May 14, 2026
517-MT	Broche 24.5" Matte White Chandelier	COL100	\$94,042	220	May 8, 2026
4456-GA-CL-MWP	Filmore 29" Hand Cut Crystal Antique Gold Chandelier	COL113	\$90,088	176	Jun 1, 2026
ITEM	DESCRIPTION	COLLECTION	ALL-CHANNEL SALES	UNITS SOLD	NEXT RECEIPT
DUM-9802-GE	Dumont 9.25" Graphite Outdoor Sconce	COL48	\$81,564	231	May 18, 2026
BAI-A2109-AG	Bailey 48" Aged Brass Chandelier	COL68	\$80,403	136	Jun 15, 2026
KEE-A3004-VG	Keenan 48" Vibrant Gold Linear Chandelier	COL32	\$73,259	366	May 14, 2026

Concentrated Out-of-Stock Risk

The Arcadia collection has 4 out-of-stock SKUs in the top 20, totaling \$516K in historical all-channel sales. The Hayes collection has 2 SKUs totaling \$634K. Most items show scheduled receipts between May and June 2026, with one item (Aragon LED Chandelier) not expected until August 2026.

What this tells you: These 20 products represent \$2.5M in cumulative historical all-channel sales and are currently unavailable to order. With most restocks scheduled by mid-June 2026, consider coordinating pre-sell outreach with your rep team — particularly for the Hayes and Arcadia collections — so orders are queued before inventory arrives.

New Introduction Performance

Crystorama currently has 44 products flagged as new introductions in the catalog (current snapshot).

44

NEW INTRODUCTIONS

Current catalog snapshot

100%

CATALOG-READY

All 44 have images + pricing

Launch-Ready Lineup

Every new introduction has both imagery and pricing in place, meaning reps and buyers can discover and order these products immediately. No catalog gaps are blocking new-item sell-through.

What this tells you: Your 44 new introductions are fully catalog-ready with no missing assets. This positions your team to push new products without waiting on content — consider featuring these items in upcoming rep communications or promotional placements to accelerate early traction.

Catalog Completeness

Current catalog snapshot — all visible products assessed for image and price completeness.

VISIBILITY	PRODUCTS	MISSING IMAGES	MISSING PRICE	COMPLETE %
Visible	2,077	0	0	100.0%

What this tells you: Every visible product in the catalog has both imagery and pricing — no gaps exist that would prevent a rep or buyer from placing an order. This is a strong foundation that requires no immediate content action.

What's Selling

Sales Concentration

CAT1 dominates with \$38.6M in all-channel sales (roughly 59% of total volume, all time). Among collections, COL100 leads at \$9.6M, followed by ADDIS at \$7.3M and HAYES at \$3.4M. The SHADE category shows near-zero sales (\$245 across 2 items all time), suggesting those products may need repositioning or removal.

By Category — all-channel sales, all time:

CATEGORY	ITEMS	ALL-CHANNEL SALES	UNITS SOLD	SALES/ITEM
CAT1	861	\$38.6M	78,114	\$44,808
CAT2	361	\$9.4M	39,013	\$25,922
CAT6	449	\$9.3M	92,847	\$20,786
CAT3	145	\$4.4M	20,865	\$30,330
CAT5	64	\$1.7M	9,692	\$26,238
CAT4	75	\$1.2M	7,167	\$16,041
CAT7	27	\$167,742	710	\$6,213
CAT8	8	\$133,067	790	\$16,633
SHADE	2	\$245	37	\$122

By Collection (Top 15) — all-channel sales, all time:

COLLECTION	ITEMS	ALL-CHANNEL SALES	UNITS SOLD
COL100	139	\$9.6M	40,942
ADDIS	133	\$7.3M	8,758
HAYES	24	\$3.4M	5,107
COL122	48	\$2.7M	7,081
COL1	46	\$2.4M	15,424
EMORY	14	\$2.0M	1,613
COL43	41	\$1.8M	9,532
COL111	111	\$1.4M	3,420
COL9	40	\$1.3M	12,272
COL127	26	\$1.0M	656
COL104	100	\$995,083	2,424
COL92	10	\$957,215	2,815
COL70	17	\$956,135	1,715
RYLEE	27	\$919,380	2,290
COL86	37	\$872,998	4,211

What this tells you: All-channel sales are heavily concentrated in CAT1 and a handful of top collections. COL100 and ADDIS alone account for roughly \$16.9M — about 26% of total all-time sales volume. The SHADE category's near-zero volume may warrant a review of whether those 2 items should remain visible or be repositioned.

§5 Commerce Analytics

168 LTM eCat orders · \$555K GMV · \$3,304 AOV · 100% iPad · 1.4% of \$39.3M all-channel

eCat Order Trend

Over the trailing 12 months, Crystorama's eCat channel generated 168 orders totaling \$555K in GMV — all submitted via iPad by field reps. Monthly volume ranged from 2 to 65 orders, with a pronounced spike in January 2026. Because orders synced from your business system are available, all-channel context is shown alongside.

MONTH	ECAT ORDERS	ECAT GMV	ALL - CHANNEL ORDERS	ALL - CHANNEL GMV	ECAT SHARE (GMV)
Apr 2026	6	\$9,170	4,040	\$2.3M	0.4%
Mar 2026	13	\$30,250	6,817	\$4.0M	0.8%
Feb 2026	29	\$92,104	5,980	\$3.5M	2.6%
Jan 2026	65	\$319,141	5,900	\$3.1M	10.2%
Dec 2025	5	\$6,773	5,649	\$2.9M	0.2%
Nov 2025	9	\$15,257	6,533	\$3.3M	0.5%
Oct 2025	8	\$14,389	6,524	\$3.4M	0.4%
Sep 2025	2	\$2,955	5,830	\$3.0M	0.1%
Aug 2025	4	\$4,989	6,308	\$3.2M	0.2%
Jul 2025	8	\$25,291	5,561	\$2.9M	0.9%
Jun 2025	13	\$29,318	5,228	\$2.9M	1.0%
May 2025	4	\$2,381	5,859	\$3.2M	0.1%
Apr 2025	2	\$3,035	2,390	\$1.6M	0.2%

January 2026 Spike

January 2026 accounted for 65 orders and \$319K in GMV — 39% of all trailing-12-month eCat orders and 57% of eCat GMV. This likely reflects a market event such as a buying show, demonstrating strong rep engagement when the platform aligns with concentrated selling opportunities. During that month, eCat briefly captured 10.2% of all-channel GMV.

What this tells you: eCat ordering spikes sharply around market events but remains modest in baseline months — averaging roughly 9 orders and \$20K in GMV outside of January. Building habitual between-show ordering habits among reps would significantly lift sustained volume.

AOV by Order Segment

Average order value across all 168 trailing-12-month eCat orders is \$3,304, with notable variation by order workflow type.

What this tells you: Hold-for-confirmation orders carry an average value 2.1× higher than confirmed orders (\$6,900 vs. \$2,669), indicating reps selectively route larger, more complex transactions through the approval workflow. The \$3,304 overall AOV reflects a healthy average ticket for iPad-submitted orders.

Top Buyers & Concentration

The top 10 eCat buyers by trailing-12-month GMV account for 31.3% of total eCat volume. Concentration is moderate — no single buyer exceeds 4.1% of eCat GMV.

CUSTOMER	ORDERS	GMV	% OF ECAT GMV
Cregger Company, LLC	2	\$22,820	4.1%
Wiseway Supply	2	\$20,690	3.7%
Wage Lighting & Design	3	\$20,334	3.7%
Graham's Lighting	1	\$19,460	3.5%
Lightstyle of Orlando	7	\$19,163	3.5%
Home Lighting of Frazer	1	\$16,602	3.0%
Richards Lighting	4	\$14,828	2.7%
Lighting, Inc	1	\$14,278	2.6%
Lighting World Decorator	3	\$12,496	2.3%
Hughes Supply Hajoca	1	\$12,179	2.2%

What this tells you: The top 5 buyers account for 18.5% of trailing-12-month eCat GMV — well below the 25% concentration threshold, reflecting a diversified buyer base. Lightstyle of Orlando stands out with 7 orders, suggesting a repeat-ordering pattern worth replicating across other accounts.

Order Type & Workflow

Trailing-12-month eCat orders break down into three workflow types, reflecting how reps route orders through the platform.

While HFC orders represent 14.9% of order count, they account for 31.1% of trailing-12-month eCat GMV (\$172,500 of \$555K), reflecting the higher value of orders routed through the approval workflow.

What this tells you: Reps are decisive — 84.5% of orders are submitted as confirmed, with the hold-for-confirmation path reserved for high-value transactions averaging \$6,900. The near-absence of quotes (0.6%) suggests reps use the platform primarily for active ordering rather than pre-sale pricing.

Total Business Context

Orders synced from your business system provide all-channel context for the trailing 12 months. Across all sales channels, Crystorama processed approximately 72,600 orders totaling \$39.3M in GMV over this period.

Monthly all-channel volume is stable, ranging from \$2.9M to \$4.0M across full months, with roughly 700 unique accounts ordering each month. eCat-originated orders represent a small fraction of this total at approximately 1.4% of GMV.

What this tells you: Your all-channel business processes significant volume — roughly \$39M annually across approximately 700 active accounts. eCat currently captures about 1.4% of that total, pointing to substantial headroom for platform-originated commerce to grow as more reps build iPad ordering into their regular workflow.

§6 Portal Engagement

29.1 daily visitors · ~7-min sessions · 15% bounce rate · traffic down 30.4% over 6 months

Traffic Health

29.1

AVG DAILY VISITORS

Last 6 months

~7 min

AVG SESSION DURATION

Strong engagement signal

15%

BOUNCE RATE

Low — visitors are browsing

What this tells you: Visitors spend an average of roughly seven minutes per session over the trailing six months, with only 15% leaving after a single page. Your portal is delivering real browsing value to the buyers who visit — they are actively exploring the catalog, not bouncing off a landing page.

Monthly Traffic Trend

-30.4%

VISITOR VOLUME CHANGE

Last 6 months

Healthy

ENGAGEMENT QUALITY

Sessions remain strong

Portal visitor volume has declined 30.4% over the trailing six months. However, engagement quality among active visitors remains strong — average session duration and bounce rate have held at favorable levels throughout the period.

What this tells you: Fewer visitors are arriving at the portal, but those who do are spending meaningful time browsing. The combination of declining volume with steady engagement depth suggests the drop may reflect fewer casual visits rather than disengagement from active buyers.

Geographic Demand

The top five states by portal visitors over the trailing six months account for roughly half of all tracked traffic. New Jersey leads by a wide margin, followed by Texas, Tennessee, North Carolina, and Mississippi.

REGION	VISITORS (6 MO)	SHARE
New Jersey	1,572	19.2%
Texas	767	9.4%
Tennessee	710	8.7%
North Carolina	606	7.4%
Mississippi	449	5.5%
Minnesota	445	5.4%
California	443	5.4%
Florida	401	4.9%
Pennsylvania	384	4.7%
Georgia	344	4.2%

What this tells you: New Jersey drives nearly one in five portal visitors over the trailing six months, consistent with Crystorama's east-coast distribution footprint. The top five states account for about half of all portal traffic, with a long tail of steady engagement across 20 tracked regions.

Traffic Sources

Portal traffic over the trailing six months is overwhelmingly direct — 86% of the 9,526 tracked visitors arrived by typing the URL or using a bookmark. Referral links account for 12%, with search, advertising, and email making up the remaining 2%.

SOURCE	VISITORS (6 MO)	SHARE
Direct	8,225	86.3%
Referral Links	1,125	11.8%
Search	143	1.5%
Advertising	31	0.3%
Email	2	<0.1%

What this tells you: The 86% direct-traffic share over the trailing six months indicates buyers know how to find the portal — they are arriving intentionally, not discovering it through search or ads. The 12% referral segment suggests some inbound linking is already working; expanding referral partnerships or search visibility could be levers for recapturing lost volume.

§7 Peer Benchmarking

5 of 6 benchmarked metrics at or above median · 1 gap area (engagement) · compared to Lighting manufacturers on same bundle

Your Peer Group

Your benchmarks are drawn from a focused group of **Lighting manufacturers on the same platform bundle**. These comparisons reflect a focused group of similar accounts on the same platform bundle. Trends are meaningful; point-in-time figures should be read directionally.

What this tells you: These benchmarks let you see where Crystorama stands relative to similar accounts using the same platform capabilities — highlighting strengths to build on and gaps worth addressing.

Benchmark Position

ADOPTION

100

Your platform adoption is **100 out of 100** — you're using every core capability available in your bundle. Among Lighting manufacturers on the same platform bundle, that places you at the **very top of the distribution**, matching the peer median of 100 while sitting at the ceiling of the interquartile range (P25: 89, P75: 100).

Top 5%

PERCENTILE

What this tells you: Crystorama is maximizing the platform's feature breadth. The next lever is deepening engagement intensity — the one area where you trail peers.

Full Benchmark Breakdown

What this tells you: Crystorama leads or matches peers in 5 of 6 benchmarked areas. The one actionable gap is engagement — increasing rep interaction frequency and workflow depth could unlock more value from the platform capabilities already adopted.

What Top Performers Do

- ↑

Consistent multi-workflow engagement — Top accounts maintain engagement scores above 60 by ensuring reps use the platform across customer targeting, product search, and presentation workflows — not just order submission.

- ↗

Deep product discovery activity — Leading accounts log extensive product search events, with top performers driving thousands of searches per month, indicating reps are actively building curated presentations for buyers.
- **Automated import consistency** — Accounts with the strongest data freshness profiles run imports across all entity types on a consistent schedule, keeping configuration data current and catalog accuracy high.
- ↗

Portal traffic with strong session depth — Top Lighting accounts attract 29+ daily visitors to their online catalog with average session durations exceeding 6 minutes, signaling deep buyer engagement.

What this tells you: The behavioral patterns separating top performers center on engagement breadth — using more of the platform’s workflows, not just the ordering pipeline. Crystorama’s adoption is already top-tier; the opportunity is driving reps to interact more frequently.

Feature Adoption Comparison

FEATURE / CAPABILITY	YOUR STATUS	PEER ADOPTION RATE
Sales Portal	ACTIVE	Widely adopted among peers
eCat Online Catalog	ACTIVE	Widely adopted among peers
PDF Catalog Generation	ACTIVE	Available — 566 catalogs created
Library & Resources	ACTIVE	Available — 7,832 views in trailing period
Product Search	ACTIVE	Available — 19,067 searches in trailing period
Customer Targeting	ACTIVE	Available — 3,757 selections in trailing period
Online Ordering (B2B Cart)	NOT ACTIVE	Not part of current bundle

What this tells you: Crystorama has activated all core platform features included in the current bundle. Online ordering is not enabled — this represents a potential expansion area if buyer self-service becomes a priority.

§8 Platform & Feature Utilization

3 core modules active · 20 smart stacks, 0 stale · 11 of 22 data entities fresh · import pipeline consistent

Catalog Health

Crystorama's platform bundle — iPad + eCat Online + Sales Portal — supports 138 registered users with 596 enrollment applicants as of April 2026. Of those users, 68 have logged in within the last 90 days (49% login rate) and 15 have placed orders through the platform in that window (11%).

138

REGISTERED USERS

Platform user base

68

LOGGED IN (90 DAYS)

15

ORDERING (90 DAYS)

11% of user base

596

ENROLLMENT APPLICANTS

Self-service registrations

FEATURE	STATUS	CONTENT
iPad Catalog	ACTIVE	Primary rep selling tool
eCat Online Catalog	ACTIVE	Buyer-facing digital catalog
Sales Portal	ACTIVE	Internal analytics dashboard
Smart Stacks	20 ACTIVE	Curated product collections
Shared Resources	36 ITEMS	Library documents and media

What this tells you: Crystorama has a well-provisioned platform with all three core modules active and a substantial content library. The 596 enrollment applicants indicate buyer interest in self-service catalog access. With 49% of registered users logging in within the last 90 days, roughly half the user base is actively engaging with the platform.

Feature Usage Intensity

Across 69 active users, the platform has recorded 75,788 cumulative engagement events and 7,707 total logins. The top features reflect a catalog-and-content-driven selling workflow, with product search, library content, and customer lookups generating the highest activity.

FEATURE	CUMULATIVE EVENTS
Product Search	19,067
Library Views	7,832
Customer Search	5,683
Customer Selection	3,757
Camera / Barcode Scan	2,484
Sales Portal Access	1,875
PDF Search	1,366
My List Views	1,213
Collection Search	773
PDF Catalog Creation	566

Library Engagement Stands Out

Library content generated 7,832 views and 582 email shares cumulatively, making it the second most-used feature after product search. Reps are actively using shared resources as a selling aid — forwarding product documentation, spec sheets, and marketing materials directly to buyers.

What this tells you: Reps rely on product search and library content as their primary selling tools — a pattern consistent with a catalog-driven, consultative sales process. The 2,484 camera scans indicate active field use during showroom visits and in-person meetings, where reps scan physical products to pull up digital details on the spot.

Data Health Report

Of 22 tracked data entities, 11 are fresh (updated within the last 30 days), 2 are in monitor status (31–180 days), and 9 are stale (not updated in over 180 days). Core selling data — products, customers, inventory, and collections — refreshes daily. The 9 stale entities are concentrated in configuration and pricing data last updated in August 2025.

11

FRESH

Updated within 30 days

2

MONITOR

31–180 days

9

STALE

>180 days

ENTITY	LAST UPDATED	DAYS	STATUS
Sales Quotas	Aug 2025	243	STALE
Options	Aug 2025	243	STALE
Option Groups	Aug 2025	243	STALE
Matrix Options	Aug 2025	243	STALE
Kit Items	Aug 2025	243	STALE
Contract Prices	Aug 2025	243	STALE
Riser Prices	Aug 2025	243	STALE
Customer Payment Info	Aug 2025	243	STALE
Commitment Reports	Aug 2025	243	STALE
Price Levels	Nov 2025	161	MONITOR
Placement Reports	Mar 2026	49	MONITOR

What this tells you: The data that drives daily selling — products, customers, and inventory — is current. However, 9 configuration entities including options, pricing tiers, and kit items have not been refreshed since August 2025, which may cause reps to encounter outdated option selections or pricing when building orders. A targeted refresh of option and pricing files would close this gap.

Data Pipeline Health

Over the trailing six months, Crystorama has maintained a consistent import cadence of 300–370 data imports per month. April 2026 shows an elevated count of 5,450 imports, consistent with a periodic bulk data refresh or catalog update cycle.

MONTH	IMPORTS
Apr 2026	5,450
Mar 2026	369
Feb 2026	300
Jan 2026	349
Dec 2025	348
Nov 2025	306
Oct 2025	117

What this tells you: Import volume has been stable and reliable since November 2025, with no missed months or processing gaps. The April spike is consistent with a catalog refresh or seasonal data update — not irregular sync behavior. The lower October 2025 count may reflect an onboarding ramp or holiday-period slowdown.

Platform Configuration Alerts

Five configuration areas show staleness or drift that may affect what reps see when building orders or reviewing account data. The primary concern is a gap between daily-refreshed product data and option/pricing configurations that have not been updated since August 2025.

FEATURE	STATUS	ISSUE	ACTION
Options & Option Groups	DRIFT	Product options last updated Aug 2025 while products refresh daily	Re-import options file to sync with current product catalog
Matrix Options	STALE	Matrix option configurations unchanged since Aug 2025 (243 days)	Refresh matrix options alongside option groups
Price Levels	MONITOR	Pricing tiers last refreshed Nov 2025 (161 days ago)	Update price level data to reflect current pricing structure
Sales Quotas	STALE	Quota data last updated Aug 2025 with no active rows — reps see no targets	Populate and import quota assignments if tracking rep performance targets
Riser Prices	STALE	Riser pricing data unchanged since Aug 2025 (243 days)	Refresh riser price data or confirm it is no longer in use

What this tells you: The primary drift risk is between daily-updated product data and option/pricing configurations last refreshed in August 2025. If product options or pricing tiers have changed since then, reps may encounter mismatches when configuring orders. A targeted refresh of the options, matrix options, and price levels files would resolve the most impactful gaps.

Smart Stack Performance

Crystorama maintains 20 smart stacks as of April 2026, all published and actively updated. No stale stacks were detected — every stack has been refreshed within the current period. The collection spans new product launches, designer lines, trend themes, bestseller lists, and compliance categories.

20

TOTAL STACKS

All published

0

STALE STACKS

None dormant

STACK NAME	CREATED	STATUS

Brian Patrick Flynn	Feb 2017	ACTIVE
Closeouts- No Swarovski	Oct 2015	ACTIVE
Libby Langdon	Jun 2014	ACTIVE
Dual Mounts	Jun 2014	ACTIVE

What this tells you: Smart stack curation is a clear strength — all 20 stacks are actively maintained and span new launches, trend collections, designer lines, and compliance categories. This gives reps a well-organized toolkit for presenting curated selections to buyers across different selling scenarios.

§9 **Appendix — Data Sources**

eCat Orders	Submitted eCat orders from the platform database. Data current as of April 2026.
Total Business (All Channels)	Orders synced from Crystorama's business system — includes all channels: eCat, phone, EDI, trade shows, showroom, and any other origin. Total all-channel business, not buyer self-service activity on a portal. Data current as of April 2026.
Customer Data	Account records from Crystorama's business system as of April 2026.
Inventory Data	Point-in-time inventory snapshot as of April 2026. We cannot determine how long any item has been out of stock.
Historical Sales Data	All-time invoiced sales history from Crystorama's business system. No invoice date available — figures are all-time cumulative, not period-specific.
Rep Engagement Data	Platform engagement event data aggregated per user. All-time cumulative totals as of April 2026.
Portal Traffic Data	eCat Online portal analytics covering October 2025 – April 2026. Includes daily visitors, pageviews, session duration, geographic traffic, and traffic sources.
Peer Benchmark Data	Anonymized median and percentile data from Lighting manufacturers on the same platform bundle. No individual account data is disclosed. Run date: April 14, 2026. These comparisons are drawn from a focused group of similar accounts on the same platform bundle. Trends are meaningful; point-in-time figures should be read directionally.
Platform Configuration	Platform feature and configuration data as of April 2026.
